Latest In Technology

■ Advantages of AC Drive Motor

- Lower maintenance since motor does not have carbon brushes
- Brushless motor results in increased uptime of machine
- Ensures longer operating time between consecutive battery charges thereby offering more rounds per charge thereby minimizing the vehicle's "carbon footprint"
- Generates less heat and hence consumes less power for cooling
- Reduces stress on battery and hence improves battery life
- Eliminates source of spark
- Whisper-quiet AC motor technology is today universally appreciated as one that ensures unmatched efficiency

Latest in Technology

■ Advantages of AC Controller

- ❑ Unique SLOPE HOLD feature
 - Buggy stops on gradients when accelerator & brake are disengaged before cruising at controlled low speed.
- ❑ Programmable speed for acceleration & deceleration
- ❑ Speed can be set from a minimum of 5 to 30 km/hour
- ❑ Controller and motor have built-in temperature sensors
- ❑ IP 65 protected
- ❑ Interlocking safety mechanisms

Localised solutions

■ Batteries

- Heavy duty deep discharge lead acid batteries, plated or tubular battery options in higher seating variants. Indigenously developed through a reputed Indian manufacturer
- Wide spread service network in India ensures fuel through life.

■ Right Hand Drive

- Responsive steering with self-adjusting rack and pinion meets standard Indian driving norms & hence ensures safe driving when compared to left hand drive.
